The Tacchini collection and designs are about more than just production and processes. The history of this family, and of the company that bears its name, is interwoven with the history of Italian and international design: each chapter was written with care and attention to detail, and each product reflects this passion. From the secret rooms where its work is done, Tacchini wants to reveal the means and methods used to prepare the materials, the care with which it treats its surfaces, safeguarding their fine appearance, the secrets and virtues of the technologies used to treat them, from the experience of the past to modern research and innovation. And this is where the booklet in your hands comes into play: an overview created to lead you through this journey into colours, materials and words.

1.1 Tacchini for the Environment

For years, Tacchini has paid careful attention to the environment, adhering to standard UNI EN ISO 14001:2004. Each phase of the production process is subject to strict controls, from design to manufacture, involving every department, every staff member and every supplier. Right through to the customer. Each Tacchini piece is produced according to exacting international standards, in working environments offering excellent standards of comfort, and using Italian

materials from certified sources. All processes are developed to ensure absolute respect for the environment, reducing waste material and emission levels to the minimum. These measures mean that every Tacchini product can be partially recycled.

1.2 Tacchini for Quality

Attention to quality begins with the choice of materials, which in themselves can convey strong sensations, and are further enhanced by the regard for detail and by technological innovations, which are noticeable in every piece and every space designed by Tacchini. Product quality is the fruit of a synergy between tradition, progress and imaginative design, and is then reflected in service quality, both during the sales process and post-sales.

1.3 Tacchini for Italy

Our creativity knows no bounds. The furniture-making tradition handed down from our founding fathers who knowingly conveyed unique values to the new generations, our constant position on the leading edge of technological progress: these factors make each product unique, and all pieces in the Tacchini collection are made in Italy. A genuine example of Italian-made quality.

Products

Our metals are painted using epoxy powder coating, in an aspirated closed circuit, so as to reduce emissions into the atmosphere. Our experience and ongoing research have led us to select components and painting cycles that offer the best possible guarantee for the end product. All paints used by Tacchini are also developed and tested to comply with environmental protection standards. The results are seen in the excellent finishes, with great surface hardness, resistance to ageing, scratching, abrasions and discolouring.

Caring for painted products

We recommend using a neutral soap, diluted in lukewarm water; never use abrasive or acidic detergents.

3.0 Chromed

Polished, Matt, Satin Chromed

Chrome plating means coating a metal with a thin layer of chrome so as to protect it from tarnishing and rusting. Chrome is a natural element, found in rocks, in the earth and in materials of vegetable and volcanic origin. Galvanic finishes ensure great resistance, in addition to handsome looks and natural dust repellence. What's more, using carefully monitored and guaranteed production processes, Tacchini ensures a durable, resilient product, all the while upholding environmental protection standards, which we also demand of all our suppliers.

There are three chrome finishes seen in Tacchini designs: polished for the collections Barry (Bed), Cage, Compact, Happy Hour, Intercity, Labanca, Millenium Drive, Parentesi, Parentesi Light, Pick-Up, Polar, Polar Perch, Quilt, Trifoglio, XL, matt for Cage, Shelter and satin finish for Chill-Out, Doodle, Isola, Slalom, and Stone.

Maintenance of chrome-plated products

We recommend using a neutral soap, diluted in lukewarm water; never use abrasive or acidic detergents; always rinse and dry the surface.

4.1 Marble

4.1 Marble

Marble is a natural material created from sedimentary rocks such as limestone or dolomite, by a metamorphic process that causes the calcium carbonate to crystallize. The beauty and uniqueness of Tacchini pieces made using marble lies in the veining: in so many different forms, always unique, like the autograph of nature itself, the greatest of all artists. The colour of the marble depends on the presence of contamination from other minerals such as clay, silt, sand, iron oxides or flint nodules, occurring in granules or layers within the original sedimentary rock. White marble derives from the transformation of calcareous rocks with no impurities. Marble is used in two different finishes: the natural finish, either polished or matt, which accentuates the porosity and tactile essence of the material, or a polyester-coated finish, which affords greater protection to the surface of the marble, improving its impermeability to all liquids.

The Tacchini collection includes several types of marble: Black Marquina, in Cage and Coot tables; White Carrara in Cage, Coot, Galleria, Chill-Out and Split tables; White Calacatta, in Cage and Coot tables; Green Guatemala in Cage tables; Biancone for Ruler tables, Isola armchair; Black Travertine for Ruler table, Cage table and Isola armchair; White Cristallino for Monzino table; Basaltina for Chill-Out

Caring for marble

We recommend removing marks and liquids immediately using a slightly damp cloth: marble is a natural material that tends to absorb liquids and thus stains quite easily. To avoid damaging its surface, never use wire wool or other abrasive items.

Mirror

Rear-Painted Glass

Common glass is a material made purely of silica, like quartz. In its purest form, glass is transparent, with a smooth surface, relatively hard, and almost entirely inert from a chemical and biological point of view. The glass used in furniture comes in a wide range of finishes and colours, and its intrinsic fragility can be overcome with chemical treatments, adding other minerals to the mix, or with physical processes, such as tempering. Rear-painted glass is made by colouring the back of the pane: the resulting surface effect is extra glossy, but transparent around the edges. This material is used to make Spindle and Labanca tables.

Caring for glass

We recommend using a dry cloth to remove dust and marks.

Tacchini uses bronze-finish mirror and smoked-finish mirror for some of the tables in its collection: smoked for Cage and Spindle tables, bronze for Cage tables

Caring for mirrors

We recommend using a dry cloth to remove dust and marks.

4.3 Stained Wood

4.3 Stained Wood

The colours used in the different collections are: dark walnut on Babela, Agnese, Spindle and Nastro; light walnut on Ruler, Monzino and Bianca; grey on Galleria, Babela, Bianca, Agnese and Spindle; natural on Babela, Galleria and Bianca; black on Babela and Bianca; white on Babela and Bianca; wengé on Kelly, Parentesi and Parentesi Light tables.

Products

Wood is a natural material that is difficult to contain within a single definition. Indeed, there can be considerable differences in grain and coloration, distinctive characteristics that define its origins and constitute its main aesthetic value. Tacchini products are made exclusively using wood sourced from areas of controlled reforestation, under the protection of laws and of local and international organizations, showing proper respect for nature and taking care of the environment we live in.

Tacchini treats its wood with what is known as an open-pore finish, to highlight its natural characteristics. Before this treatment, the surfaces undergo brushing: an abrasive treatment that brings out the fibres in the ash wood.

4.4 Lacquered Wood

4.4 Matt Lacquered

Wood is a natural material that is difficult to contain within a single definition. Indeed, there can be considerable differences in grain and coloration, distinctive characteristics that define its origins and constitute its main aesthetic value. Tacchini products are made exclusively using wood sourced from areas of controlled reforestation, under the protection of laws and of local and international organizations, showing proper respect for nature and taking care of the environment we live in.

Tacchini's table tops are made of wood fibre, faced then lacquered on both sides using specific paints. The lacquering comes in three different finishes: the first is slightly embossed (Cod. T-B), giving a mildly textured look to the surface, the second is a velvet finish (Cod. T-A) using polyurethane to transform the wood into a soft, perfectly scratchproof surface, like a velvet diamond, and the third is a gloss finish.

The embossed finish (Cod. T-B) is found in Split, Kelly and Nastro tables, the velvet finish (Cod. T-A) only in Kelly, and the glossy finish on the top of Stone table.

Cod. T-A

Cod. T-B

Caring for wood

We recommend not exposing wood to direct light, as it could affect the colour. Dust using a soft cloth, and do not use abrasive products or solvents, which might scratch the wood or damage the surface finish.

4.5 Full Color

4.5 Full Color

Wood is a natural material that is difficult to contain within a single definition. Indeed, there can be considerable differences in grain and coloration, distinctive characteristics that define its origins and constitute its main aesthetic value. Tacchini products are made exclusively using wood sourced from areas of controlled reforestation, under the protection of laws and of local and international organizations, showing proper respect for nature and taking care of the environment we live in.

Full color is a material made of sheets of paper soaked in heat-curing resin, then exposed to the combined action of heat and high pressure. It is dyed through, meaning that the same colour seen on the surface is also visible throughout the entire thickness of the top.

Caring for Full Color

To clean the surface, we recommend using a damp cloth, avoiding ammonia-based products, which tend to render the dull the lustre on the Full Color, and drying with a soft cloth.

To clean the surface, we recommend using a damp cloth, avoiding ammonia-based products, which tend to dull the lustre on the laminate, and drying with a soft cloth.

Products

T59: Cage, Coot, Stone (table)

T60: Cage, Coot, Stone (table)

The laminates used in Tacchini table tops are produced at high pressure: made of numerous layers of paper soaked in heat-curing resins and compacted through the combined action of heat and high pressure. This particular type of laminate, with standards set and guaranteed by European certification, offers exceptional durability and resistance to all stresses. The laminate table tops in the Tacchini collection are those of Cage, Coot and Stone.
